No Skidding®
INDUSTRIAL STRENGTH
ANTI-SLIP FLOOR TREATMENT
REGULAR #90378

Industrial Strength Anti-Slip Floor Treatment

Regular #90378 for ceramic, mosaic, granite, terrazzo, quarry tile, slate, glazed brick, porcelain/enamel tubs, shower stalls & other stone or mineral surfaces.

The Long-Lasting Answer To The Problem Of Dangerous, Slippery When Wet Hard Floor Tile

- A clear chemical treatment that increases the co-efficient of friction and the safety of the surface when wet.
- Helps reduce slip injury on all natural stone floors.
- Easy application and low odor.
- Does not noticeably alter the appearance of the surface.
- One application lasts up to five years.
- The only treatment system in the world available in custom formulations for:
 - Regular, most natural stones #90378.
 - Heavy duty cement floors & similar #50378.
 - Porcelain Tile #80378.

Typical Applications

Restaurants, hotels, motels, supermarkets, hospitals, nursing homes, factories, food processing plants, health clubs, shopping malls, office buildings, swimming pool decks, bathroom floors, bathtubs, showers and staircases. No Skidding® Anti Slip Treatment can be used indoors and outdoors.

What Is No Skidding® Treatment?

No Skidding® Treatment is a water based, low odour, colorless liquid. It is not a coating that can wear and that requires repeated re-application.

No Skidding® Treatment was formulated to be a quick, easy application on natural stone floors. It is simply mopped onto the clean floor using a lambs wool applicator. The floor is kept wet with the Treatment, usually for 15 to 20 minutes, and then rinsed away with clean, cold water. This simple process will increase the coefficient of friction and will typically be effective for up to 5 years with one application. The floor can be put back into use immediately. There is no cure time as with coatings. Good housekeeping practices are assumed.

How Does No Skidding® Treatment Work?

All natural stone contains small amounts of silica. No Skidding® Anti Slip Treatment is carefully formulated to dissolve a controlled amount of the silica so as to create thousands of minute, shallow indentations in the surface.

This profile is so subtle that it cannot be felt or seen. Because the profile sits **BELOW** the level of the surface, it does not affect the cleaning process as with a profile that stands **ABOVE** the surface such as an anti slip paint coating.

Ideal For Commercial Kitchens.

When the surface is wet with water, these shallow indentations fill. When a pedestrian walks across the wet surface and their shoe starts to slide, the water is squeezed out of the indentations turning them into thousands of suction cups that helps stop the shoe from slipping.

All that is required of the property owner is good housekeeping to keep the floor free of soil accumulation and grease.

No Skidding® Treatment is a simple, low cost and low maintenance method of boosting floor safety, yet maintaining good gloss levels. See "testimonials" in our website www.noskidding.com.

No Skidding® Anti-Slip Treatment was used on the new Hong Kong International Airport, the largest ever application of an anti-slip treatment. This terminal is designed to receive 85 million passengers annually. No Skidding® Anti-Slip Treatment was selected because of its effectiveness, ease of application, low maintenance and durability.

World-Wide Usage

No Skidding® Anti-Slip Treatment is in use in over 40 countries around the world including mass transit, airports and by most North American hotel chains.

Versatile

Suitable for use on most natural stone tile (not suitable for use on synthetic tile or coated surfaces).

No Complicated Mixing

Supplied ready to use! Simply pour into a plastic pail and mop onto floor. One gallon will treat over 400 sq. ft. Lambs wool applicator recommended.

Grout Cleaner

Helps draw out ingrained soil in grout lines.

An Effective System For Commercial Kitchens & Greasy Areas

Anti-Slip Treatment and On Guard degreaser can help you to improve safety on greasy, dangerous floors in supermarkets, fast food and food processing.

Leading Technology Cleaners

For on-going maintenance, we recommend No Skidding® On Guard, a highly concentrated cleaner & degreaser that removes dirt rapidly by breaking the electrostatic bond between the soil and the hard surface. Self-neutralizing. Helps prevent emulsification of grease into a slippery residue on the floor. Removes hard caked on grease. Soil and grease build-up will reduce effectiveness.

Easy Application

#90378 is ready to use. Quick and easy to apply after testing. Simply clean floor, pour Treatment into a pail and apply. Keep surface damp for the recommended time, then rinse away. There is no curing period; the area may be used immediately after application. One gallon will treat over 400 sq. ft. The treatment is not affected by chlorine, acids, or alkalis. Very cost effective. Complies with co-efficient of friction requirements for ASTM, OSHA, ADA, Canadian and U.S. Government industrial safety standards. Approved by Agri-Foods Canada for use in the food industry. Always follow directions on label and use tools recommended. This product cannot eliminate the possibility of slipping.

PLEASE READ AND FULLY UNDERSTAND LABEL AND MSDS BEFORE USING.

Important: Seller's and manufacturers only obligation shall be to replace such quantity of the product proved to be defective. Neither seller nor manufacturer shall be liable for any injury, loss or damage, direct or consequential, arising out of the use of or the inability to use the product. Before using, user shall determine the suitability of the product for the intended use, and the user assumes all risk and liability whatsoever in connection therewith. No statement of recommendation not contained herein shall have any force or effect unless in an agreement signed by officers of the seller and manufacturer. Buyer assumes all risk and liability associated with disposal.

No Skidding® products are in use around the world in hotels, warehouses, factories, shopping malls, public transit systems, airports, hospitals and senior care, office complexes, restaurants, day care, schools, fitness clubs, government and military facilities.

ORIGINALS AVAILABLE ON REQUEST

We have had the No Skidding® product on our pool decks and in some areas of our pool locker rooms for over 3 years. It does what the name says - no one slips! In 1995 we had the entire pool deck retilled. The No Skidding® product, approved by the contractor, was applied at that time. Because the No Skidding® did not change the appearance of our new tile and approved by the contractor, the 20 year warranty on the tile remains valid! No falls and a big warranty. We are very pleased!

-Public Municipal Pool

Without any hesitation I commend you for your top quality products as well as service. I am very pleased with the outcome of both the lobby as well as the kitchen. I would not hesitate to recommend you and your products to others. I look forward to continuing our working relationship in the future. We appreciate the support and information needed to purchase and apply the No Skidding® product. It has to be the easiest and most cost effective way to protect against slipping and falling in our tubs. The surface of our tubs has not been altered in any way and are very easy to keep a clean appearance.

-The World's Largest Hotel Chain

"After applying the No Skidding® on our quarry tile in the main kitchen area of our Nursing Home, the staff noticed a remarkable difference. They wanted to know when we were going to do the same with the dishroom! The No Skidding® product has provided the staff with a safer environment. The floor provides better traction for staff and is slip resistant. The grouting becomes whiter too! Our handyman found No Skidding® very easy and quick to apply to the quarry tiles. Thank you for finding me an affordable way to accomplish the task of reducing slips and falls."

-Nursing Home Chain

"No Skidding® treatment applied to the stairs is a resounding success. Since the installation of No Skidding® we have not had one slip."

-Shopping Mall Chain
